

Test is written in the Postman.

You can download it from here: <https://www.postman.com/downloads/>

How to install: <https://learning.postman.com/docs/getting-started/installation-and-updates/>

When installation is ready simply import the *Sense.postman\_collection.json* file. Then to execute the test click on the *Swagger* in the collection, then *Run* then, set *iterations* to: 300 and click *Run Swagger*. That's all. To read my local test results, simply import it to your Postman and open.

Below screenshots how to run the tests:
